

Affordable Reference-Based Pricing Solutions

For Small to Mid-Size Employers

Small Business Benefits

Our Trustmark Healthy ChoicesSM self-funded health benefit plan designs use reference-based pricing¹, a strategy leveraged by large employers to help control plan costs. Employers have the flexibility to customize a plan design with a choice of deductible, coinsurance, out-of-pocket limit, provider copays and other optional benefits.

Additional advantages include:

Freedom of provider choices means members can select providers, based in the U.S., that best suit their needs for most covered services.²

Stop-loss insurance provides protection against the financial impact of a large number of covered claims, an individual catastrophic covered claim or both.

Trusted Member Care specialists are available to help members get the most out of their benefits.

Cost-effective pharmaceuticals provides members with nationwide access to retail pharmacies, as well as home delivery and mail order pharmacy services and PrudentRx specialty drug copay assistance program.

Streamlined process for resolving balance bills and member updates on the status of balance bills.

Cost-saving services are available to members, including telemedicine services via TeladocTM Health, the Healthcare BluebookTM online quality and cost transparency tool, Included Health medical second opinions, Active&Fit DirectTM for access to discounted gym memberships, and more.

Balance bill protection ensures members are not responsible for paying balance bills.

Reach out to your sales contact for more information.

¹Refer to the plan document for more details.

²Except for organ transplants and specialty drugs, when benefits are available, and services are performed as outlined in the plan document.
