

Medical Specialty Drug Management Powered by Archimedes

We work with Archimedes, LLC to provide employers with a complete specialty drug management solution backed by near real-time data that addresses total medical specialty drug spend, regardless of benefit design or configuration.

Our Medical Specialty Drug Management program impacts savings through:

Prior Authorization

Retrospective Drug Utilization Review

Site of Care Management

Solution Differentiators

- Reduce waste caused by inappropriate use and billing errors
- Data-based recommendations on site of care
- Rich reporting to guide decisions and identify savings
- Identify drugs to be moved to the medical or pharmacy benefit

Driven by Data

Our solution is driven by advanced, near real-time analytics and business intelligence tools that integrate medical data to help:

- Identify emerging trends and opportunities for savings
- Ensure appropriate use
- Reduce duplicate billing
- Identify and correct billing errors
- Monitor the effectiveness of specialty pharmacies, infusion providers, and physicians

Smart Prior Authorization Engine

Our Medical Specialty Drug Management solution uses a rules engine specially designed to handle specialty drugs for more comprehensive coverage criteria than traditional prior authorization programs. This engine:

- Combines complex dosing schedules and genetic testing requirements
- Allows the flexibility to add new drugs and criteria within minutes
- Communicates with members and providers throughout the process

Health Benefits

Retrospective Drug Utilization Review

By leveraging an industry-leading analytics platform, our solution can identify, intervene, and resolve previously undetected specialty savings opportunities.

Site of Care Brings Savings

The cost to receive infused medications can vary widely, depending on where members receive their care.

Cost Range per Infusion*

Medical Office or
Infusion Center:
\$4,000

Hospital
Outpatient Center:
\$12,000

Using detailed claims data analysis to identify members who are ideal for voluntary site-of-care transition, our solution reaches out to members and prescribers to encourage them to use the most cost-effective, clinically appropriate setting.

Powerful Reporting

Trustmark provides a suite of client reports to assess performance and manage spend of specialty drugs:

Spend across benefits

Top specialty drugs

Savings opportunities

Specialty therapeutic prior authorizations

**Specialty trend, utilization, and cost over
time against benchmark**

Top prescribers

Disease state

* Cost data provided by Archimedes, LLC.

Expect **more.**
Benefit more.
